LEDDY POWER

Volvo Penta:
A Century of Experience

A world leader in diesel engine technology, Volvo Penta builds on 100 years of innovative marine engineering experience. Our new D series engines combine superior performance with increased fuel efficiency, reduced exhaust emissions an unmatched reliability. From helm to prop, Volvo Penta is your total solution for innovative commercial marine power systems.

Volvo Penta D-Series
Keeping Your Props Turning

- Unmatched fuel efficiency significantly lowers the cost of operation
- Advanced, electronically controlled inboard diesel engine
- Low Maintenance design allows for extended service intervals, increasing uptime
- Tier 3 emission compliant

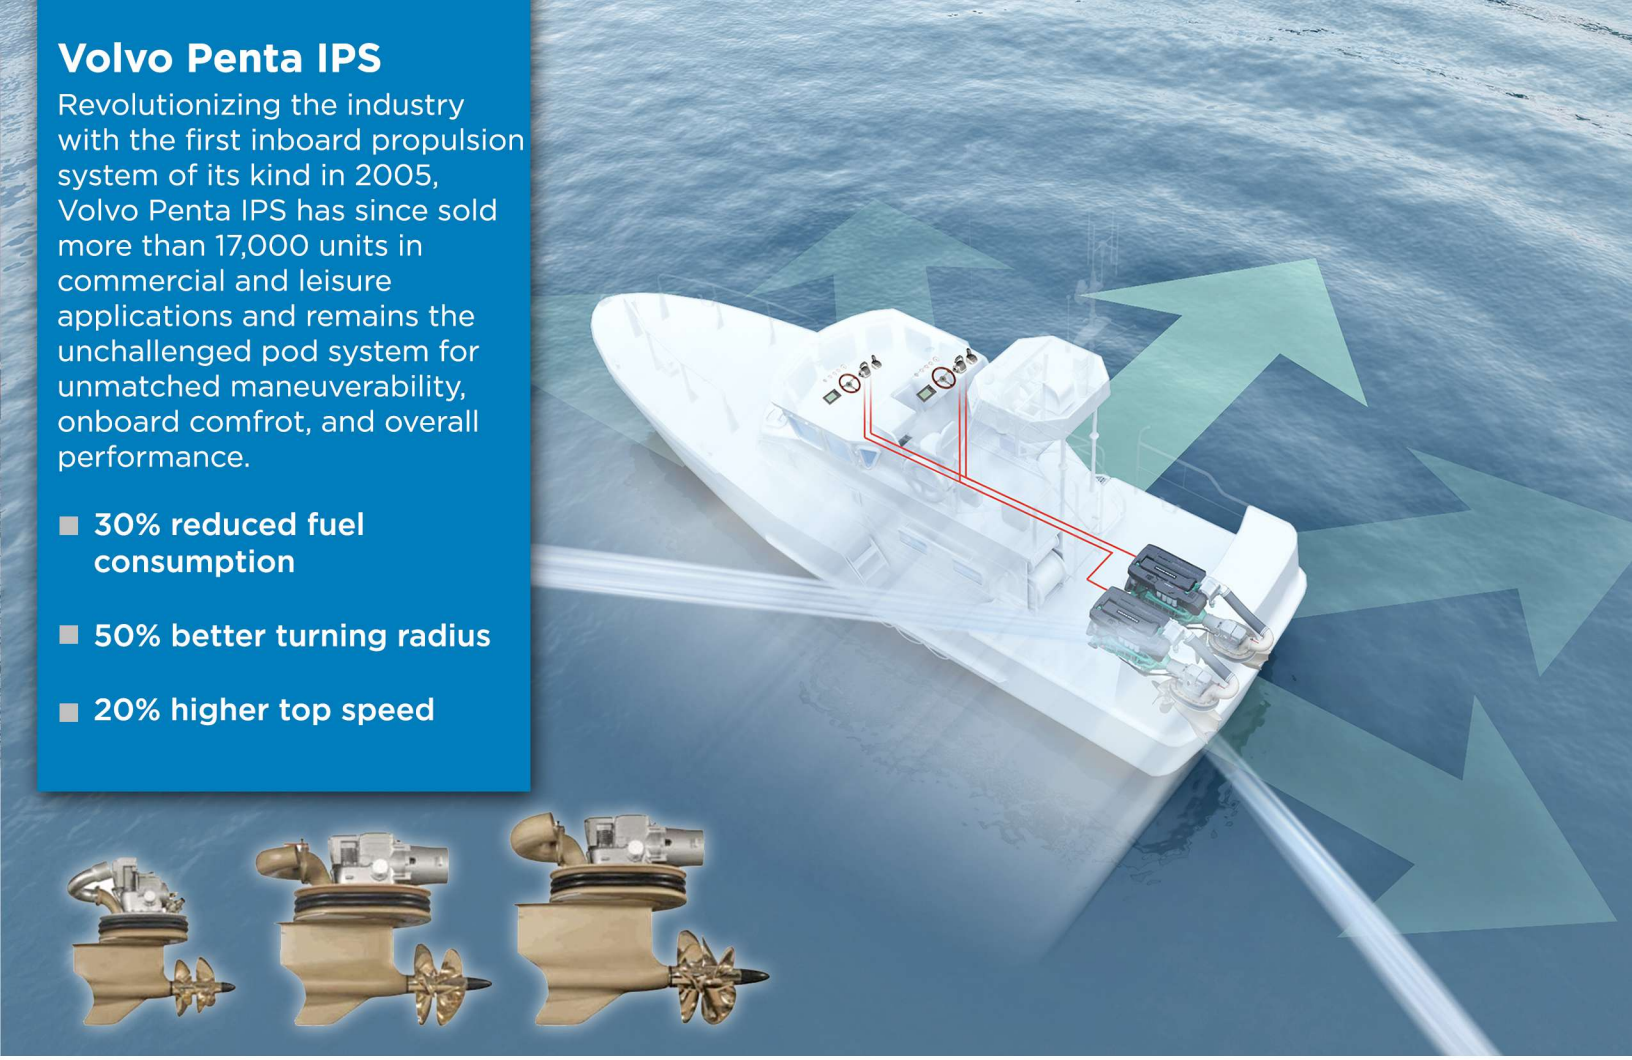
Volvo Penta Sterndrives
The Ultimate in Reliability and Durability

- Commercially-rated DPH Duoprop sterndrives
- Specially developed to match the tremendous torque and power of the D4 and D6 engines
- Patented propellers deliver exceptional performance
- Fully Hydraulic XACT CONTROL steering boasts balanced steering resistance and immediate response
- The most comprehensive sterndrive product lineup to fit demanding commercial needs

Volvo Penta IPS

Revolutionizing the industry with the first inboard propulsion system of its kind in 2005, Volvo Penta IPS has since sold more than 17,000 units in commercial and leisure applications and remains the unchallenged pod system for unmatched maneuverability, onboard comfrot, and overall performance.

- **30% reduced fuel consumption**
- **50% better turning radius**
- **20% higher top speed**



Leddy Power is committed to providing our customers with innovated power solutions, uncompromising service and support, and dependable high quality products. Our friendly and knowledgeable sales and service staff can assist you with a turnkey service providing a customized approach to your power application needs.
